Re: Recommendation for Services by HVAC Controls Corporation – Electrical Sub-Contractor

As the project manager and inspector for a very large scale Building Automation System replacement project, I have had countless opportunities to visually inspect the workmanship and field efficiencies of the installation services provided by HVAC Controls Corporation. I would rate their level of workmanship, and thoroughness of the product they provide, at the highest rating. Furthermore, the field and management staff at HVAC Controls are courteous, attentive, informative, and by all standards very professional. Their apparent attention to detail provides a valuable degree of confidence and “peace of mind” in the critical and highly specialized services they provide, and their flexibility in adapting to the numerous encumbrances inherent to a public sector project environment indicates that they come well prepared and able to meet the needs and conditions of a successful GSA project.

Sincerely,

**DAVID
