ATTN: To whom it may concern

RE: HVAC Controls Testimonial

This is my testimonial on my experience working with HVAC Controls.

HVAC Controls has been my subcontractor on jobs that I have managed for the past three years. They have been the subcontractor on Siemens jobs for over eighteen years.

HVAC Controls bids are always submitted on time and in line with other subcontractor bids. They always show up on time to the job site when they say they will. They are always willing to work with Siemens to save costs for both Siemens and the customer. All of HVAC Controls' employees are well trained and very professional.

HVAC Controls has just completed a five million dollar EMS retrofit of an occupied building for me with very few complaints.

HVAC Controls is always my first subcontractor of choice.

Regards,

Keith McWilliams
